Art Unit: 2823

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-17 and 20-23, drawn to method, classified in class 438, subclass 787.
- II. Claims 18-19, drawn to device, classified in class 148, subclass 33.3.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process wherein the thickness of an oxide layer is selectively reduced by etching.

Because these inventions are distinct for the reason given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
